Student Assist Programme -

This activity uses the Student Assistance Programme (SAP) to support and develop the emotional health and wellbeing of Primary School children in Years 3 – 6. SAP facilitates the creation of a 'support group' for the children to share their thoughts and feelings in a supportive and safe environment. In addition the children learn to develop their communication and listening skills; learn respect for others and improves their feelings of empathy. The activity aims to increase academic performance and give the pupils a better understanding around the importance of school.
